175ml glass of red or white wine 13% ABV 2.3 UNITS	50ml glass of fortified wine 20% ABV 1 UNIT	25ml single spirit & mixer 40% ABV 1 UNIT	50ml double spirit & mixer 40% ABV 2 UNITS	275ml bottle of alcopop 5% ABV 1.4 UNITS

Recommended guidelines:

Are you drinking above lower-risk guidelines?

Risk Level	Men	Women	Common Effects
LOWER RISK	14 units or fewer per week spread evenly across 3 days or more*		<ul style="list-style-type: none"> Increased relaxation Sociability
INCREASING RISK	15-49 units per week	15-34 units per week	<ul style="list-style-type: none"> Less energy Depression/stress Insomnia Impotence
HIGHER RISK	More than 50 units per week (or more than 8 units per day)	More than 35 units per week (or more than 6 units per day)	<ul style="list-style-type: none"> High blood pressure Memory loss Increased risk of liver disease and cancer

*Women who are pregnant or planning pregnancy are advised to avoid alcohol completely

There are so many benefits to reducing your alcohol consumption - here are some of them:

BETTER PHYSICAL HEALTH

Cutting down on how much alcohol you drink will reduce your risk of developing serious health issues such as cancer, liver or heart disease and could contribute to lowering your blood pressure.

IMPROVED MENTAL HEALTH

Alcohol can contribute to the development of mental health difficulties, as well as making existing problems worse. Reducing your alcohol intake can have a positive effect on your mood and contribute to improving your relationships with others.

INCREASED ENERGY

Alcohol can affect how well you sleep which can lead to a bad night's rest and leave you with less energy than normal. Even just a few drinks can interfere with the normal sleep process. Reduce how much alcohol you drink to see the positive effect on your energy levels.

HEALTHIER APPEARANCE

Frequent drinking increases your calorie intake which can have an effect on your weight and physical health. Alcohol also dehydrates the body which can leave skin looking dull. Cutting down on how much you drink and opting for low calorie alternatives can contribute to maintaining a healthy weight and appearance.

SAVE MONEY

Do you know how much you spend on alcohol each week? There are many alcohol calculator tools online that can work out how much you spend. Why not have a go and work out how much you could be saving?
